

SHRI JAGANNATH SANSKRIT VISHVA VIDYALAYA SHRI VIHAR, PURI (2019-20)

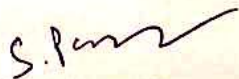

4.4.2 Procedures and policies for maintaining and utilizing physical, academic and support facilities - laboratory, library, sports complex, computers, classrooms etc. (maximum 500 words) (information to be available in institutional Website, provide link)

The University operates under well-defined rules and regulations outlined in the Universities Act of 1989 and the Odisha University (New) Act 2020. These Acts establish the Syndicate, Academic Council, and other statutory bodies as vital components for the governance of the University. The Syndicate, Senate, Academic Council, and Post Graduate Council are pivotal in overseeing various Policy related activities of the University.

The Development Section consisting of Development Officer, Engineer, Section Officer and junior Assistants, oversees construction and maintenance. A team of maintenance staff addresses issues related to civil work, water supply, electricity, masonry, carpentry, and gardens. New constructions funded by the State Government are managed directly by the Odisha State Police Housing Welfare Society or CPWD for RUSA projects at present and previous years respectively.

Recent initiatives focus on creating conducive learning environments, upgraded hostels, improved residential facilities, cleaning restrooms, and all the academic and administrative buildings and maintaining the aesthetic green Campus. Regular maintenance includes Generators, Air Conditioners, Water Purifiers, Computers, and accessories, overseen by a System Engineer.

The Development and Maintenance wing handles asset management, maintaining facilities such as laboratories, libraries, sports areas, and classrooms. All procurement is done through the Government Gem portal, (Government e Market place) while digital payments facilitate salary and financial transactions.
